

## Statement of Conformance

### Recovery Act (ARRA), Section 1605 (Buy American Provision)

Section 1605 of the American Reinvestment and Recovery Act specifies that, for public building projects which use ARRA funds, all manufactured goods for these projects must be produced in the United States. As a manufacturer of such goods, specifically those designed for building automation and control purposes, **KMC Controls** certifies the following:

- We manufacture exclusively within the United States of America. This includes our pneumatic, analog electronic, and DDC (direct digital control) products and related software with the exception of those noted below.
- Our manufacturing includes circuit board assembly, injection molding of components and cases, and electronic assembly, mechanical assembly, and final product assembly.
- The vast majority of our manufacturing takes place at our corporate headquarters in Indiana. Some pneumatic products are assembled in Virginia from components produced in Indiana.
- A 5-minute video, available on the KMC web site (<http://www.kmccontrols.com/default.aspx?id=american>), provides some visual insight into some aspects of our production processes.
- As a convenience to our customers, KMC Controls supplies some products on a “pass-through” arrangement from other manufacturers. We cannot claim Buy American conformance or non-conformance for these products. The following product series are included in this category:
  - CTE-3000 Series Limit Controls
  - HMO-4532 Temp. Sensor Thermal Compound
  - HMO-4533/4534/4543/4544 Temp. Sensor Wells
  - IEI-1001 LCD Display Module
  - L00LVS Series Low Voltage Switches
  - L200 Series Lighting Control Relays
  - L80301 Series Momentary Action Switches
  - L900 Series Lighting Panels
  - LOSxxx Series Occupancy Sensors
  - LZMDSW Series Digital Switches
  - MEP-3000/3500 Series Actuators
  - MEP-425/455 Series 62"/142"-inch-lbs Actuators

- REE-2004 Solid State Relay
- REE-3100 Series Relays
- REE-3200 Series Relays
- SAE-1000/1100 Series CO and CO2 Sensors
- STE-1400 Series Temperature Sensors
- TPE-1400 Series Pressure Transducers
- VEZ-41/42/43/44 Series Zone Valves
- VFZ Series Valve Body Replacements
- XEE-6000 Series Transformers
