

November 1, 2010

Dear Alps Controls,

Thank you for your request for documentation regarding our valves and valve actuators. All of our valve assemblies (valve/actuator combinations), except for our magnetic valve line, are assembled in our Siemens manufacturing facility located in Buffalo Grove, Illinois. The following valve series and actuators are also assembled in Buffalo Grove from component parts:

Powermite MZ Series (599-011XX)  
Powermite MT Series (599-020XX)  
Flowrite Threaded Series (599-03XXX)  
Flowrite Flanged Series (599-059XX and 599-06XXX)  
All 2", 4", 8" and 12" pneumatic valve actuators (599-010XX)  
GDE, GLB and GMA actuators for ball valves  
656 and 658 Series pneumatic valve/actuator combinations

This information is listed on the product label of each of these products as "Country of Origin: US".

Other valves and electric valve actuators not listed above are produced by other Siemens facilities around the world and stocked for combining into assemblies in our Buffalo Grove facility. Our 2-way ball valves are sourced from a third party US company that produces them overseas, then we assemble the ball valve, bracket and actuators in Buffalo Grove.

Please let me know if you have any questions or require any additional information.

Best Regards,

Byran Blackham  
Senior Product Manager, Valves and Valve Actuators
