

October 30, 2012

On Feb 13, 2009, Congress passed the American Recovery and Recovery Act of 2009 (ARRA). Within the bill, Sec. 1605a requires that projects receiving funding from the Act use American manufactured goods (including iron and steel) for the construction, alteration, maintenance, and or repair of public buildings and public works.

Cleveland Controls Air Switch products are manufactured in our Cleveland Ohio facility and are compliant with the ARRA.
